

# THE ULTIMATE GUIDE TO CRYSTALS IN YOUR BUSINESS

Discover the power of crystals and their properties, which can, with the power of intention, help you secure success.

This guide has some of Kerry's personal favourites.

Crystals are fantastic resources and indeed allies to have in your business to enhance the energetics and creative boosting involved to ensure success.

### Selenite:

Not only is this crystal good to keep your business space energetically clean and tidy to stop stagnant energies accumulating around you as you work but having a selenite (or gypsum spar) sitting on top of your desk will promote peace and calm out to all around you.

Place in and around your home as well as workspace. In all four corners of the property or room is best to keep the vibrational frequency high.

# **Orange Calcite:**

One of THE best stones for enhancing and fostering creativity where-ever it is required within your business.

Sit a piece where you do most of your work.

# Apophyllite:

To soothe and restore nerves when things feel overwhelming.

Keep a piece next to your bedside as well as your desk to keep your sleep clear of worries.

### **Aventurine:**

Give all your hard work a helping hand with Aventurine. Wear it for as long as you wish and watch success unfold. Helps you take a leap of Faith.

Best worn as a pendant.

### Citrine:

This sunny stone is GREAT for optimising energy levels and seeing the bright side of life and holding your energy, courage and nerve steady in times when it is needed.

The clearer the stone the better (avoid heated amethyst if you can)

Best worn or placed in purse or pocket.

# Tiger's Eye:

For protection and the courage to push forward business growth and improves insight in to how you can do that.

Wear as an amulet.

# **Clear Quartz:**

To amplify and increase intention, energy and thought.

Perfect for ALL business owners.

Place in the room where you work most.

# **Your Secret Energy Source for Business Success**

As a business founder, your success is deeply connected to your overall wellbeing. It's not about sacrificing one for the other – it's about finding the balance that propels you forward. Crystals work energetically so there is no requirement for you to be in the room so saves long journeys and therefore you can relax more.
